BIOMETRIKA

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

MANAGING EDITOR

E. S. PEARSON

ASSOCIATE EDITORS

M. G. KENDALL JOHN WISHART

in consultation with

HARALD CRAMÉR J. B. S. HALDANE

R. C. GEARY G. M. MORANT

MAJOR GREENWOOD

VOLUME XXXV

1948

ISSUED BY

THE BIOMETRIKA OFFICE, UNIVERSITY COLLEGE, LONDON

PRINTED AT THE UNIVERSITY PRESS, CAMBRIDGE

First printed in Great Britain at the University Press, Cambridge
Reprinted by offset-litho by Percy Lund Humphries & Co. Ltd

CONTENTS OF VOLUME XXXV

Memoirs

		PAGES
I.	James Fowler Tocher. With frontispiece	1—5
II.	On some modes of population growth leading to R. A. Fisher's logarithmic series distribution. By D. G. KENDALL	6—15
III.	The studentized form of the extreme mean square test in the analysis of variance. By K. R. NAIR	16—31
IV.	The estimation of non-linear parameters by 'internal least squares'. By H. O. HARTLEY. With three Figures in the Text	32—45
V.	The geometrical method in the theory of sampling. By DAVID FOG. With two Figures in the Text	46—54
VI.	Proofs of the distribution law of the second order moment statistics. By JOHN WISHART. With one Figure in the Text	55—57
VII.	Tests of significance in multivariate analysis. By C. RADHAKRISHNA RAO	58—79
VIII.	Alternative systems in the analysis of variance. By N. L. JOHNSON	80—87
IX.	An examination and further development of a formula arising in the problem of comparing two mean values. By ALICE A. ASPIN	88—96
X.	On the power function of the longest run as a test for randomness in a sequence of alternatives. By G. BATEMAN. With three Figures in the Text	97—112
XI.	Sur les courbes de fréquence de K. Pearson. By M. DUMAS. With eighteen Figures in the Text	113—117
XII.	The distribution of the extreme deviate from the sample mean and its studentized form. By K. R. NAIR	118—144
XIII.	The Fisher-Yates test of significance in 2×2 contingency tables. By D. J. FINNEY	145—156
XIV.	The power function of the test for the difference between two proportions in a 2×2 table. By P. B. PATNAIK. With four Figures in the Text	157—175
XV.	The analysis of contingency tables with groupings based on quantitative characters. By F. YATES	176—181
XVI.	The probability integral transformation when parameters are estimated from the sample. By F. N. DAVID and N. L. JOHNSON. With three Figures in the Text	182—190
XVII.	A table for the calculation of working probits and weights in probit analysis. By D. J. FINNEY and W. L. STEVENS	191—201
XVIII.	Some further notes on the use of matrices in population mathematics. By P. H. LESLIE	213—245
XIX.	The transformation of Poisson, binomial and negative-binomial data. By F. J. ANSCOMBE	246—254
XX.	Some theorems on time series. II. The significance of the serial correlation coefficient. By P. A. P. MORAN	255—260

PAGES

XXI. Some results in the testing of serial correlation coefficients. By M. H. QUENOUILLE . . . . . 261—267

XXII. Fractional replication arrangements for factorial experiments with factors at two levels. By K. A. BROWNLEE, B. K. KELLY and P. K. LORAINE . . . . . 268—276

XXIII. The relationship between finite groups and completely orthogonal squares, cubes and hyper-cubes. By K. A. BROWNLEE and P. K. LORAINE . . . . . 277—282

XXIV. Systematic sampling of continuous parameter populations. By A. E. JONES . . . . . 283—290

Continuation of Dr Jones's Paper. By M. G. KENDALL . . . 291—296

XXV. The precision of observed values of small frequencies. By J. B. S. HALDANE . . . . . 297—300

XXVI. Note on Professor Haldane's paper regarding the treatment of rare events. By E. S. PEARSON . . . . . 301—303

XXVII. A further note on the mean deviation. By H. J. GODWIN . . 304—309

XXVIII. A note on the asymptotic distribution of range. By D. R. COX. With four Figures in the Text . . . . . 310—315

XXIX. On the role of variable generation time in the development of a stochastic birth process. By DAVID G. KENDALL. With two Figures in the Text . . . . . 316—330

XXX. 2×2 Tables; the power function of the test on a randomized experiment. By E. S. PEARSON and MAXINE MERRINGTON. With eight Figures in the Text . . . . . 331—345

XXXI. Statistical analysis of a non-orthogonal tri-factorial experiment. By W. L. STEVENS . . . . . 346—367

XXXII. Comparisons of heights and weights of German civilians recorded in 1946–7 and Royal Air Force and other British series. By G. M. MORANT. With twenty-one Figures in the Text . . . . 368—396

XXXIII. Testing the significance of correlation between time series. By G. H. ORCUTT and S. F. JAMES. With fourteen figures in the Text . 397—413

Miscellanea

PAGES

(i) A note on the χ^2 smooth test. By H. L. SEAL 202

(ii) Rank correlation and product-moment correlation. By P. A. P. MORAN 203—206

(iii) Tests of significance in the variate difference method. By N. L. JOHNSON 206—209

(iv) Review of M. G. KENDALL's *The Advanced Theory of Statistics*. By B. L. WELCH 210

(v) Note on the median of a multivariate distribution. By J. B. S. HALDANE. With one Figure in the Text 415

(vi) A property of rank correlations. By H. E. DANIELS 416

(vii) Approximation errors in distributions of independent variates. By H. O. HARTLEY 417

(viii) Correlations between χ^2 cells. By F. N. DAVID 418

(ix) Note on 'Proofs of the distribution law of the second order moment statistics'. By JOHN WISHART 422

(x) Review of D. J. FINNEY's *Probit Analysis*. By N. L. JOHNSON . . 423
